

Haztainer IBC

1,000 lt & 500 lt versions

3:1 return ratio

Easy ball valve discharge

A smarter way to handle your hazardous products

- > Australian tested and UN approved for transportation by road, rail and sea
- > 3:1 return ratio – great alternative to traditional 205 lt drums delivering a 25% saving in storage, transport and handling
- > Once empty, returned units are classified as suitable for general transport to save you more in transport costs
- > Choice of 1,000 and 500 litre versions
- > Ideal solution for dangerous goods in Packaging Groups II and III and Class 3 and specific Class 8 products including pharmaceutical, chemical and other related industries
- > ISO container compatible, maritime approved, 4 way entry pallet – perfect for export
- > OH&S friendly, easy one person operation to assemble, fill and disassemble
- > Made from recyclable HDPE panels with galvanised steel base and frame
- > Lockable, tamper evident lid and panels for superior product security including base sump for maximum discharge
- > Half fold front drop gate for ease of access

- > Low, adjustable outlet collar lock to maximise product discharge
- > Range of accessories and a specialised disposable liner bag that negates the need for cleaning
- > No capital outlay and environmentally responsible to minimise packaging waste and disposal costs
- > Highly efficient, flexible rental system – hired and de-hired through our depot network

A better, safer system

The difficulties in transporting hazardous goods are now virtually eliminated. The Haztainer system is an effective option compared to single trip packaging.

As a rentable IBC, the Haztainer is a perfect solution for exporting your hazardous goods.

The Haztainer is good enough for the United Nations to approve it for transporting by sea UN 31HA2/Y/XX XXAUST/TNT 6003/12330/1722.

Haztainer IBC

Length	1068 mm	1068 mm
Width	1012 mm	1012 mm
Height	925 mm	464 mm
Flatpacked height	365 mm	295 mm
Weight	170 kg	130 kg
Volume Cap	1,000 lt (nominal)	500 lt (nominal)
S.G. Rating	1.6	1.7
Static Stacking	5 High (Loaded)	7 High (Loaded)
	15 High (Collapsed)	17 High (Collapsed)

The Total Package Includes: Liner and Protective Cassette

The Haztainer 1,000 lt Liner and Cassette in conjunction with our Haztainer system meets the requirements for the transport and storage of Packaging Groups II and III and Class 3 and specific Class 8 products.

The outer nylon co-ex layer allows this food contact approved liner to be used in hot fill/exposure applications of up to 90° C. For Dangerous Goods applications in conjunction with a Haztainer the temperature rating is 60° C.

The Haztainer liner provides 100% product protection and integrity. Its use eliminates the risk of any residue build up, a benefit few of our competitors can claim.

Smart Benefits

Haztainer is more than an IBC, it's part of an integrated hazardous goods system which fills, stores and discharges your valuable raw materials. The Haztainer system also includes a wide range of optional ancillary equipment developed and designed to efficiently fill and totally discharge all its contents.

It's a great saving for you and reduces waste. Not only do Haztainers protect and deliver your hazardous products safely, they also help reduce your handling costs.

The daily hire rate allows you, as required, to match your cost to your throughput, Ceva Pallecon provides you with a total handling solution.
